
MBS Software Distribution and Data Loading solution to be powered by Carillon technology

9th November 2020, Gilching, Germany - MBS Electronic Systems GmbH today announced they have signed an agreement with Carillon Information Security Inc to incorporate the well-established, industry leading, LSAP Security Suite into MBS's aircraft software distribution and data loading solution. This positions MBS to ensure their data loading solution meets the latest regulations and requirements. This means that the mini PDL-Pad data loader and supporting products will be compliant with ARINC 827, ATA Spec 42 and the future security release of ARINC 645.

MBS Electronics Systems GmbH are renowned in the industry for selling the market leading mini PDL-Pad. "We are delighted to work with Carillon", said Karin Nicholls, co-founder and Managing Director, "Teaming up with Carillon to provide digital signature security in our products is an exciting development for our company, which will enable our current customers to upgrade existing equipment and new customers to acquire compliant equipment to meet the imminent, more stringent, security requirements."

"This agreement underscores our commitment to continue to innovatively develop the mini PDL-Pad and complimentary data loading products to allow secure, affordable and reliable data loading for the aviation industry."

"We are excited to be working with MBS, and are happy to add them to our partners helping to realize our goals of enabling simple and secure electronic distribution of aircraft software and operational data.", said Patrick Patterson, president of Carillon, "Aircraft Operators are increasingly aware of the efficiencies and operational flexibility that these solutions bring, and, in these challenging times for the industry, we're looking forward to working with MBS as they deploy this exciting capability to their customers."

About MBS Electronic Systems GmbH

MBS provides the e-enabled data loading system of choice for many of the world's largest and most prestigious airlines.
